EZ Mark™ BUTT GAGES

WITH MORTISE-DEPTH SCRIBER

"Hinge Profile Cutters" for fast, easy, precise butt-hinge mortising. Available in four sizes—3'', 3 1/2'', 4'', 4 1/2''. The gages mark and cut sharp, clean profiles in doors and jambs for accurate, professional-looking hinge installation. All four sizes feature an integral "depth scriber" for marking the correct depth of mortises in doors and jambs. Made of heat-treated steel alloy. Made in U.S.A.

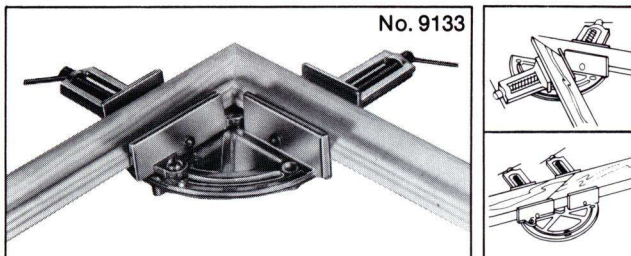

Packed one per display box.

Stock No.	Hinge-plate Size	Units per Shipping Carton	Shipping Weight per doz., lbs.	Price each

Adjustable™ CORNER AND SPLICING CLAMP

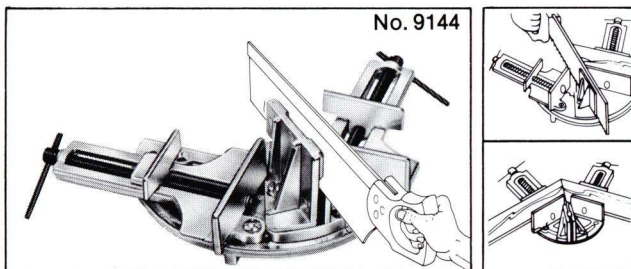

A lightweight, handy clamping device for making picture frames, screens, storm doors and windows; and for splicing molding and trim. Clamps miter or butt joints at any angle—0° to 180°. Holds work of different widths up to 3'', leaving joints fully exposed for nailing, fastening, gluing, dowsing, or for making miter corrections. Two countersunk holes permit mounting to a work surface. Made of die-cast aluminum alloy. Made in U.S.A.

Packed one per display box; 36 per shipping carton.

Adjustable™ MITER BOX AND CORNER/SPLICING CLAMP

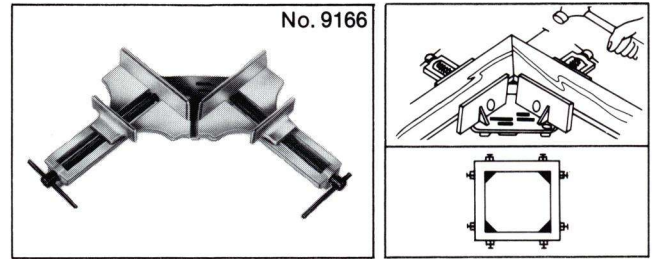

Two tools in one—(1) adjustable miter box/saw guide for making true vertical miter cuts in stock up to 3'' wide (2) adjustable corner/splicing clamp. The only adjustable miter box that also holds work while sawing, the No. 9144 adjusts to and locks at various angles for making miter cuts 45° to 90°. As a corner/splicing clamp, it opens to full 180° for splicing. Saw guide adjusts for any blade width. Made of die-cast aluminum alloy. Made in U.S.A.

Packed one per display box; 24 per shipping carton.

90° CORNER CLAMP

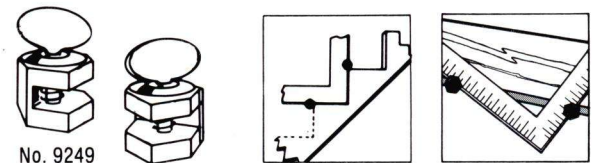

Clamps miter or butt joints at true 90° angle for making picture frames, screens, storm doors and windows. Holds work of different widths up to 3'', leaving joints fully exposed for nailing, gluing, dowsing, or for making miter corrections. Two countersunk holes permit mounting to work surface. Four clamps pre-positioned on a work surface make a framing fixture of any desired dimensions. Made of die-cast aluminum alloy. Made in U.S.A.

Packed one per display box; 48 per shipping carton.

Adjustable™ DRILL SHARPENING ATTACHMENT

For sharpening all round shank drills up to 1/2'' diameter. Adjusts easily to four settings for grinding different angles—

49° for plastics, wood, soft materials

59° for general drilling

69° for hard materials

88° for bottom drills and routers.

Adjustment also is provided to guarantee correct center angle grind. Made of die-cast aluminum alloy. Made in U.S.A.

Packed one per display box; 24 per shipping carton.
